EXPERIENCE

JUNE 2015-PRESENT

CLARUS COMMERCE, LLC.

Rocky Hill, CT

Clarus Commerce creates and markets high-value subscription websites.

Software Developer

- Work with product and marketing teams to design and implement product enhancements.
- Enhanced the company's mobile strategy; member of the mobile task force team focused on ways to boost mobile performance and conversions: one of our initiatives led to a 10% increase in conversions.
- Integral developer on the team transitioning the move towards a continuous deployment software life cycle.
- Key Projects: built an iOS prototype app using Xamarin; wrote tools to monitor the status of our source code using .Net and the GitHub API; built a file integration system to integrate with the partner behind one of our White Label products using .Net; go-to developer to build and implement end user tests for any of our websites through Optimizely using JavaScript.

Junior Developer

- Awarded "Rookie of the Year" — an award voted upon by the entire company.
- Managed the code release process.
- Assisted Quality Assurance with any bug fixes that were needed.

Feb. 2015-Present

WIGEON, LLC.

New York, NY

Wigeon, a social media start-up, facilitates the sharing of movies, music, books, places and more.

Co-Founder/Chief Technology Officer

- Launched, with co-founders, a social media company from idea stage to capital raise to product launch.
- Coordinated product road map, decision maker in the technical direction of our products, integral in building out Wigeon's website and Web App, and worked with outside software developers to develop our iOS App.
- Active in capital raising, strategic development and marketing — currently our iOS app has 1000 users.
